

Works at Silk Willoughby, gas site, Mareham Lane

You may be wondering what we are doing. Well it's all part of our commitment to maintain the integrity of our pipes and assets.

Cadent maintains and operates the gas pipe network in your area, including the gas pipes up to and including the safety valve at the gas meter.

We wanted to let you know that we'll be carrying out work to upgrade the fencing and lighting and associated works for the above ground installation site on Mareham Lane from early Spring.

The first activity you will see on the ground will be the tree and vegetation clearance associated with the areas planned for construction this summer. This will take place during April/May and ensure that there will be no risk to nesting birds. Our ecologists have been busy undertaking surveys and all tree and vegetation clearance will be carried out under the supervision of one of our ecologists. We'll do everything we can to minimise disruption to you while working at the site and construction traffic will avoid populated areas where possible. Your gas supply won't be affected by our work and the project will last approximately 12 to 18 months.

Still have a question?
